Presents

WILDCRAFTING: HOW TO COLLECT WILD PLANTS FOR COMMERCIAL AND HOME USE

A Workshop with Michael "Skeeter" Pilarski

We are surrounded by useful plants wherever we go.

Native and non-native plants.

Food, medicine, seeds, fibers, craft materials, building materials, etc.

We will introduce the main medicinal plants found in western Washington including info on optimum timing of harvest, collecting techniques, tools, processing and drying. Sustainable wildcrafting concerns and guidelines will be addressed.

Michael Pilarski of Friends of the Trees Society has been commercially wildcrafting medicinal plants for 22 years in Washington State, north Idaho and Northwest Montana. He farms a diversity of medicinal and food plants in complex, agroforestry systems and is the author of *"Ethnobotany and Ethnoecology Resource Guide"* and *"Growing & Wildcrafting Medicinal Plants in the Pacific Northwest."*

| Date | Location | Price |
|---|---|-------|
| Wednesday February 15, 2017 7:00 to 9:00 pm in the Evening | Dandelion Botanical Company 5424 Ballard Avenue Seattle, Washington 98107 | \$20 |
