| FEE          | $90 |

This hands-on workshop will show you the possibilities of getting into small-scale medicinal herb production. Useful for those already growing herbs as well as beginners. Our systems are influenced by agroforestry and permaculture. The main focus will be on what tasks need to be done at this time of year. This Fall focus- root harvesting, seed collecting & cleaning and winter prep.

Bring a brown bag lunch or meals available to purchase at venue.

Keep an eye on the weather forecast and come prepared as we will be outside part of the day.
